# NATIONAL LISTING OF VALIDATED BRUCELLOSIS-FREE HERDS

The 1966 National Listing of Validated Brucellosis-Free Herds contains the name and address of over 2,100 herd owners in 45 States and Puerto Rico. The swine herds listed are those reported from the various States as of March 31, 1966.

Swine herds are Validated or Revalidated Brucellosis-Free every month of the year. The owner of a qualified herd receives a validation certificate and a metal sign indicating the brucellosis-free eligibility period.

## Herd Validation Plan

A swine herd that completes two consecutive negative brucellosis blood tests of all breeding animals, 6 months of age or over, is designated as a Validated Brucellosis-Free Herd. The tests must be 30 to 90 days apart. Validation is effective for a 12-month period and applies to the offspring of all breeding animals tested, including Specific Pathogen-Free (SPF) pigs from such herds. Herds may be revalidated for additional 12-month periods upon completion of an annual negative herd test.

For information concerning swine brucellosis eradication procedures and the Validated Brucellosis-Free Herd program, contact your county agent, vocational agricultural teacher, veterinarian, or your State-Federal Animal Health regulatory officials.

## Area Validation Plan

Areas may qualify as Validated Brucellosis-Free for a period of 3 years provided all breeding herds in the eradication area qualify under one of the following plans. (1) Negative herd tests, in which all breeding swine 6 months of age or older are tested within the 18-month period of time prior to the

date Validation is requested for the area. (Owners desiring a Validated Brucellosis-Free Herd must have a second negative herd test 30 to 90 days after the first). (2) Establish negative herd status under the Market Swine Testing Program as follows: Each year for not less than 3 years, 10 percent of the breeding swine or a minimum of one animal, whichever is the greater, shall be blood tested.

By March 31, 1966, 117 counties in 8 States eradicated brucellosis in all swine herds in the county. These counties are known as Validated Brucellosis-Free areas. All counties in Vermont, Utah, and Nevada are free of swine brucellosis. California has qualified 49 of their 58 counties; Massachusetts has 6 of 14 counties free; and Georgia, Hawaii, and Tennessee have qualified 1 county each as Validated Brucellosis-Free.

## Validated Brucellosis-Free Herds in Interstate Movement

At present 48 States will accept breeding swine from Validated Brucellosis-Free Herds in interstate movement without further blood tests. This will eliminate the expense of additional tests formerly required when breeding stock was transported across State lines.

Most States require breeding swine that are to enter their State be negative to the brucellosis test within 30 days prior to date of entry or originate in a Validated Brucellosis-Free Herd. Only Alaska, Colorado, and Puerto Rico require breeding swine from a Validated Brucellosis-Free Herd be retested within 30 days prior to entry. Swine producers who ship swine interstate should contact officials of the State of destination for other entry requirements.

The owners of Validated Brucellosis-Free Herds offer a dependable source of brucellosis-free breeding stock. Boars--and other replacement breeding stock--should be purchased from Validated Brucellosis-Free Herds.

ERADICATE SWINE BRUCELLOSIS- - - - -VALIDATE YOUR HERD

The various breeds are identified in the National Listing by code letters as follows:

B = Berkshire
Bl = Black
C = Chester White
D = Duroc
Gr = Grade
H = Hampshire
He = Hereford
Hy = Hybrid
In = Inbred
L = Landrace
lb = Large Black
Lc = Lacombe
M = Mixed Breeds
Mi = Minnesota
Ma = Montana
O = O. I. C.
P = Poland
Pa = Palouse
S = Spotted (Pland China)
T = Tamworth
W = Wessex
X = Crossbred
Y = Yorkshire
